# EUROTECH VISITING RESEARCHER PROGRAMME 2027

To increase cooperation among researchers at its partner universities, EuroTech is inviting applications to join its Visiting Researcher Programme. You can apply if you:

1. Want to visit one of the following universities:
   - *Technical University of Denmark* - ***DTU***
   - *École Polytechnique Fédérale de Lausanne* - ***EPFL***
   - *Institut Polytechnique de Paris* - ***IP Paris***
   - *Technion Israel Institute of Technology* - ***Technion***
   - *Eindhoven University of Technology* - ***TU/e***
   - *Technical University of Munich* - ***TUM***
   - *Czech Technical University* - ***CTU***
   - *Tallinn University of Technology* - ***TalTech***
2. Are a professor or postdoc at one of the above-mentioned institutions. Researchers that have recently been offered a tenure-track position are especially encouraged to apply;
3. Want to find a simple way of financing a visit to a partner university. The visit can last up to two weeks and the funding to cover travel and accommodation is up to €1,200/week*.

** Researchers visiting Technion will receive additional support of €500 per visit from Technion as the travel costs are higher.*

If you are looking for a host at a EuroTech member university, check the university's website for researchers in your field. Contact your local EuroTech Operations Board member or your university's Liaison Officer in Brussels well before the deadline for help identifying potential hosts and arranging introductions.

**Want to know more? Please contact your EuroTech Operations Board member.**

EuroTech Universities Alliance

**Timeline**
Deadline: **15 February 2027.**
The results will be sent beginning of March 2027. The visit (and all administrative matters concerning reimbursement) must be completed **by December 2027**.

**How to apply**
Fill out the form and send it with a support letter from your host (template) to your local EuroTech Operations Board member. Please note that this programme only funds the visit of the applicant, i.e. you cannot apply to obtain funding on behalf of members of your research group. Regulations for work-related travel authorisation and reimbursement at your home institution apply.

**Assessment criteria**
The applications will be assessed by your home university. The highest score is given to applications aiming to establish a new collaboration within EuroTech's Research and Technology Areas:

- *Energy systems*
- *AI and Robotics*
- *Semicon-Photonics-Quantum*
- *Biotech*

Additional priority is given to projects that are linked to infrastructure access and from academics who joined their home institution recently. Funding is handled at your home university.
